**GCH Tool to Display Accuracy-Boosting Grinder Component  
at IMTS 2018**

WARREN, MI (May 11, 2018) - GCH Tool Group, the world's largest supplier of new spare parts, components and assemblies for centerless, ID, OD, double disc and surface grinders, is pleased to feature its two-axis CNC dresser in booth 237323 (North Hall) at the IMTS 2018 show in Chicago, from September 10 - September 15.

GCH's exclusive two-axis CNC dresser handles the most complex part geometries, whether linear, straight, stepped or tapered, as well as circular interpolation for concave, convex shapes and arcs. This grinder upgrade provides increased accuracy and reliability and eliminates the need for cam repair.

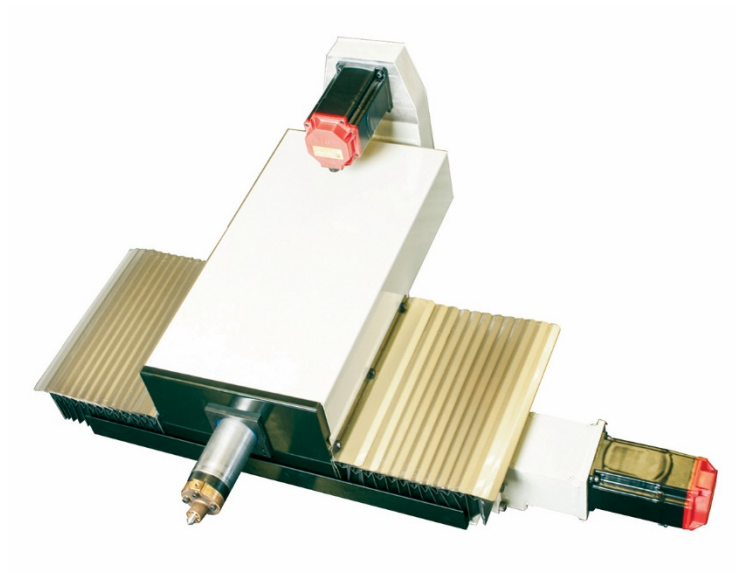

"Increasing the profitability of our customers' grinding operations is our primary goal, that's why we continually improve and enhance our technology," said Dan Geddes, president of GCH Tool Group.
